EDUCATION

MCA
Master of Computer Applications
DES Pune University
2025 – 2027

BCS (Hons.)
Bachelor of Computer Science
The New College, Shivaji University
Graduated: April 2025
CGPA: 9.0

HSC – Science
Maharashtra H.S. & Jr. College
2021 – 2022

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, Java 17, C++, C, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Mobile: Flutter

Backend: Node.js, Express.js, Java Servlets, JSP, RESTful APIs

Databases: MongoDB Atlas, PostgreSQL (Supabase), Firebase, MySQL

AI/ML: RAG Architecture, Prompt Engineering, Claude/OpenAI APIs, Vector Search

DevOps: Docker, Vercel, Render, Railway, Git/GitHub, Tomcat 10

Automation: n8n

PROFESSIONAL SUMMARY

Resourceful Full-Stack Developer and AI SaaS Builder specialising in the MERN stack, Python, and Java. Proven ability to take complex ideas from zero to one — architecting scalable web applications, mobile platforms, and automated workflows. Known for a strong "figure-it-out" mentality, high adaptability in emerging technologies, and a commitment to building impactful, real-world digital products.

KEY PROJECTS

Lead Developer | April — Productivity & Life-Management App
Personal Project

- Architected a multi-functional app with custom Smart Input logic to reduce user friction across finance, health, and academic tracking modules.
- Engineered a biometric-secured (FaceID/TouchID) Vault system via modal overlay for sensitive document management.

AI Engineer | RAG AI MCA Assistant
Academic Project

- Developed an intelligent academic chatbot leveraging Retrieval-Augmented Generation (RAG) to dynamically process and answer context-specific university queries.
- Integrated advanced LLM prompting and vector search to guarantee high-accuracy information retrieval.

Full-Stack Developer | DES Connect — Campus Social Network
Academic Project

- Built and deployed a comprehensive social networking platform using the MERN stack to centralise communication for university students.
- Hosted backend on Railway and frontend on Vercel for edge delivery, ensuring zero downtime.

Backend Developer | BCS Webapp — College Management System
Final Year Project · CGPA 9.0

- Designed a web application to streamline academic and administrative activities for the BCS department at New College Kolhapur.
- Engineered role-based access controls for Admins, Teachers, and Students using Java Servlets, JSP, MySQL, and Tomcat 10.

Security Dashboard Developer | Cyber Guard Pro
Personal Project

- Engineered a web security intelligence dashboard using Python and Streamlit with real-time password breach analysis and proactive digital safety features.

ACHIEVEMENTS & AWARDS

- **Promptopia Finalist —** Reached finals of a competitive prompt engineering competition, demonstrating advanced AI logic structuring.
- **2nd Rank – Paper Presentation (New Horizon) —** Recognised for outstanding technical research and delivery.
- **2nd Rank – Paper Presentation (KSHITIJ) —** Awarded for high-quality academic presentation skills.
- **Avishkar Research Convention —** Presented innovative technical research at the prestigious state-level Shivaji University convention.
- **National Conference – Shivaji University —** Participant in the "Emerging Trends in Science and Technologies" national conference.
- **1st Rank – Project Presentation** – Willingdon College, Sangli
- **2nd & 3rd rank – Project Presentation** – New Horizon
- **Participated in Shark Tank, Ideathon**
