CAREER OBJECTIVE

To contribute as a software developer and AI-focused engineer in an innovative organization where I can apply my technical expertise, build impactful digital products, and continuously grow through real-world challenges while contributing to scalable and future-oriented solutions.

PROFESSIONAL SUMMARY

Resourceful Full-Stack Developer and AI SaaS Builder specializing in the MERN stack, Python, and Java. Proven ability to take complex ideas from zero to one, architecting scalable web applications, mobile platforms, and automated workflows. Known for a strong "figure-it-out" mentality—capable of rapidly mastering new technologies and delivering complete, real-world solutions. Passionate about modern UI/UX design and integrating advanced AI models (LLMs, RAG) to solve practical business and consumer challenges.

TECHNICAL SKILLS

- **Languages:** JavaScript/TypeScript, Python, Java (Java 17), C++, C, SQL
- **Frontend & Mobile:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, Flutter
- **Backend & APIs:** Node.js, Express.js, Java Servlets, JSP, RESTful APIs, Postman
- **Databases & BaaS:** MongoDB Atlas, PostgreSQL (Supabase), Firebase, MySQL
- **AI & Machine Learning:** RAG Architecture, Prompt Engineering, Claude / OpenAI APIs, Vector Search
- **DevOps & Tools:** Docker, Vercel, Render, Railway, Git/GitHub, n8n (Automation)

PERSONAL STRENGTHS

- Strong problem-solving mindset with a real-world product-building approach.
- Fast learner with high adaptability in emerging technologies.
- Ability to work effectively both independently and collaboratively.

- Deep interest in AI systems and engineering scalable digital products.
- High focus on clean software architecture and delivering premium UI/UX experiences.

KEY TECHNICAL PROJECTS

Lead Developer | April (Productivity & Life-Management App)

- **Architected** a highly secure, multi-functional application utilizing "Smart Input" logic to reduce user friction across finance, health, and academic tracking modules.
- **Engineered** a biometric-secured (FaceID/TouchID) "Vault" system for sensitive document management.
- **Designed** a minimalist monochrome UI leveraging modern glassmorphism principles.

AI Engineer | RAG AI MCA Assistant

- **Developed** an intelligent academic chatbot leveraging Retrieval-Augmented Generation (RAG) to dynamically process and answer context-specific university queries.
- **Integrated** advanced LLM prompting and vector search concepts to guarantee high-accuracy information retrieval and minimize hallucinations.

Full-Stack Developer | DES Connect (Campus Social Network)

- **Built and deployed** a comprehensive social networking platform using the MERN stack to centralize communication for university students.
- **Managed** robust cloud deployments by hosting the backend on Railway and utilizing Vercel for frontend edge delivery, ensuring high availability and zero downtime.

Mobile App Developer | UniVerse Pro

- **Designed** a cross-platform mobile application utilizing Flutter and Firebase, integrating real-time data synchronization.
- **Implemented** AI-powered features for intelligent scheduling, mental well-being tracking, and personal finance management within a scalable modular architecture.

Security Dashboard Developer | Cyber Guard Pro

- **Engineered** a specialized web security intelligence dashboard using Python and Streamlit.
- **Integrated** proactive digital safety features, including real-time password breach analysis and automated URL malware scanning.

Product Lead | Batuz India

- **Launched** a localized B2B workflow hub built on advanced Notion automations to streamline operational needs for Indian startups.
- **Formulated** structured SaaS pricing models and executed outreach campaigns targeting local Pune agencies.

EDUCATION

Master of Computer Applications (MCA)

DES Pune University | Pune, Maharashtra | *Expected: 2027*

- **PRN:** 3542511013

Bachelors in Computer Science Entire **9 CGPA**
The New College, Kolhapur

HSC
Maharashtra High School & Jr. College | Kolhapur, Maharashtra | 2022

SSLC
Tiny Tots English Medium School | Nipani, Karnataka | 2020

CURRENT LEARNING & EXPLORATION

- Advanced MERN Stack Development & Scalable Cloud Deployment Architectures
- AI SaaS Systems, Agent Workflows, Prompt Engineering & RAG Pipelines
- React Native & Flutter Development for cross-platform solutions
- Modern Motion UI & Interactive Web Experiences

LEADERSHIP & ACHIEVEMENTS

- **Promptopia Finalist:** Reached the finals of a competitive prompt engineering competition, demonstrating advanced proficiency in AI logic structuring and model communication.
- **Avishkar Research Participant:** Conducted and presented innovative technical research at the prestigious state-level Avishkar convention.
- **Event & Web Lead (Team Soularc):** Spearheaded the digital logistics and web platform planning for large-scale campus events, including the "Holi Soul 2026" celebration.
- **Leadership Candidate:** Actively pursued the Placement Coordinator role at DES Pune University to bridge the gap between academic talent and industry opportunities.
